## **ZEISS Labscope**

Your Imaging Software for Digital Classrooms and Routine Laboratory Work

# Your Imaging Software for Digital Classrooms and Routine Laboratory Work

- › **In Brief**

- › The Advantages

- › The Applications

- › Technology and Details

- › Service

Labscope is your easy-to-use imaging software for connected microscopy. Be it for the laboratory, university, school or even your hobby – it's easier than ever before to snap images, record videos and measure your microscopic samples. Labscope transforms your ZEISS network-compatible microscopes into a WiFi-enabled imaging system.

You can easily create digital classrooms or digital labs – just connect to any of the microscopes at any point in time and from anywhere in your room. Explore the advantages of an interactive learning atmosphere where you can engage your students fully and enthuse them with the content of your lessons. You don't need to invest in parallel IT-equipment for your sequential processes. Control your cell laboratory microscopes with a connected iPad, iPhone or Windows PC, store images by workplace and observe cell cultures comfortably from your office. Then share your images – at the touch of a finger.

Whether you use a Windows PC, iPad or iPhone, you will enjoy the same consistent GUI, with the same look, feel and user experience: no training required. It's never been so simple and efficient until now.

# Simpler. More Intelligent. More Integrated.

## Enjoy Connected Microscopy

In both education and routine laboratory work, connectivity is a core feature, offering you control, remote observation and the use of mobile devices to observe and share. With Labscope you can transform your student lab via a WiFi-enabled network into a digital classroom. Labscope lets you display all the live images from all the connected microscopes at any time and from anywhere in the room. Observe how your students are doing in real-time. Project images from any microscope onto the wall or a TV screen. Discuss what students are seeing with the whole class. As you move freely around the room, 'lecture & listen' becomes 'show & see'.

## Simple. Imaging. App.

Whether you're using a traditional Windows PC with mouse and keyboard, a Windows tablet with touchscreen, an iPad, or even an iPhone – we've got you covered. Labscope runs on all of these devices, and it has been tuned to each of them to provide the best possible user experience – whether on a small touchscreen or a large monitor. Labscope leverages network technology to switch effortlessly between microscopes and get real-time thumbnails of all microscopes in the room. But if you're just looking for an easy-to-use, single-microscope imaging solution, you can skip the network and connect your ZEISS microscope to any Windows computer via a USB cable.

## Powerful Features with Every Touch

Labscope is the optimal choice for your digital classroom or lab. You can access cameras from multiple microscopes simultaneously from just one device. Get your students measuring, annotating and documenting their results by making it easy to snap images or record videos. Save your images in the ZEN-compatible .czi file format, which includes all metadata and a separate annotation layer – or select the .jpg format to save space. Use the integrated pointer to lead your students to areas of interest. Let them do their hand drawings with the drawing function. Labscope works easily by touch and gesture control, independently if you use it on your iPad or PC.

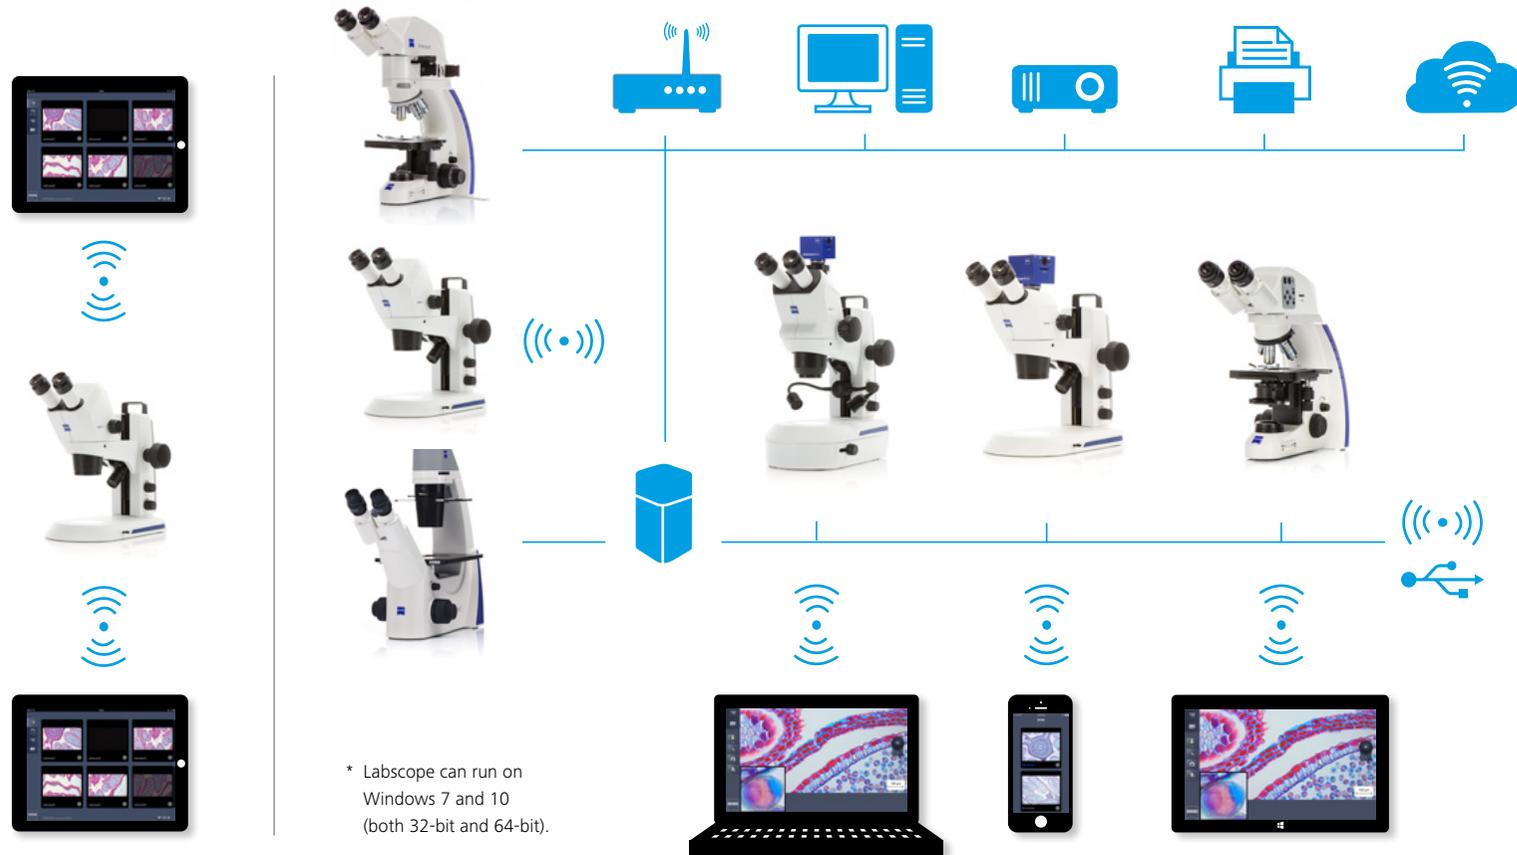

# Your Insight into the Technology Behind It

- › In Brief
- › **The Advantages**
- › The Applications
- › Technology and Details
- › Service

To connect a WiFi-enabled network that spans the whole classroom, use Labscope-ready ZEISS microscopes such as Primo Star HDcam, Primotech, Primovert HDcam or Stemi 305 cam – or any other microscope in combination with the Axiocam ERC 5s microscope camera.

## Document and archive your results.

And share the images in your digital network. It is full of possibilities.

\* Labscope can run on Windows 7 and 10 (both 32-bit and 64-bit).

- › Technology and Details
- › Service

## Digital imaging applications:

- Educational / teaching facilities
- Histopathology
- Cytology
- Hematology
- Parasitology
- Microbiology
- Environmental studies
- Food / beverage control
- Cell laboratories
- Sample preparation
- IVF documentation
- Quality control
- Microphotography

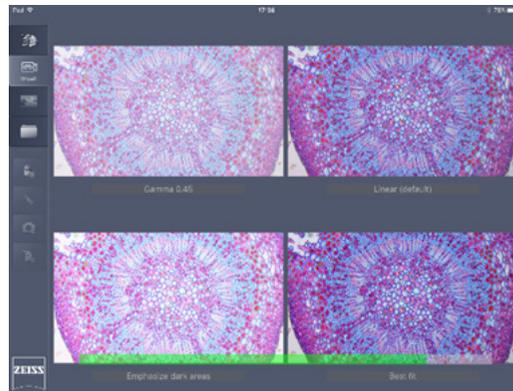

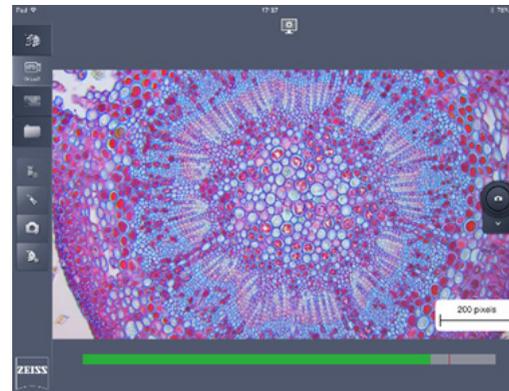

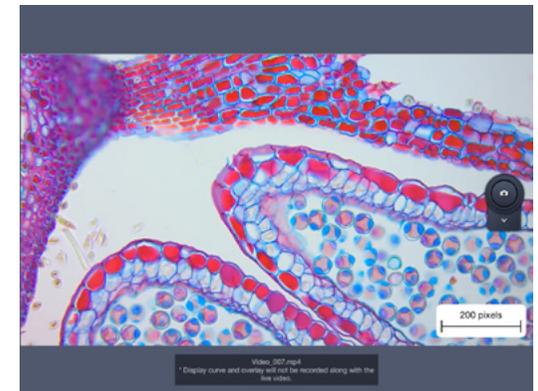

Image observation in parallel

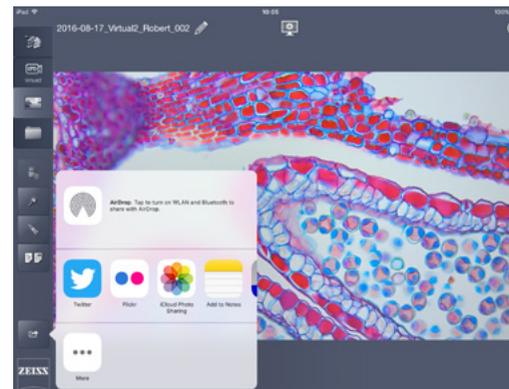

Focus indicator

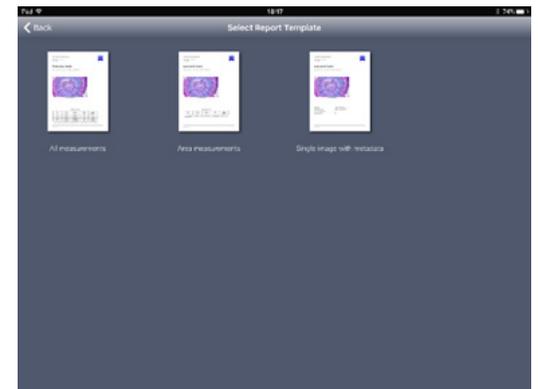

Video recording

Annotation & Measurement

## Enjoy these benefits as an educator in your digital classroom:

- Motivate students to work on your lessons content by using digital devices.
- Monitor all student microscopes from your iPad or iPhone while you move around the classroom.
- Give individual support, e.g. pick a student's image to view on the projector and explain it to all.
- Share live streams, images and videos online.
- Download Labscope free in the App Store.
- No training course is required for Labscope.

Digital classrooms enable you to provide a **personalized learning atmosphere**.

*Use your iPad camera as a digital drawing tube.*

*Pointer function*

## Application Information:

<b>Seller</b>	Carl Zeiss AG
<b>Category</b>	Education, Documentation, Microphotography
<b>Compatible ZEISS microscopes</b>	Primo Star HDcam, Primotech, Primovert HDcam, Stemi 305 cam, AxioCam ERc 5s
<b>Languages</b>	English, Czech, French, German, Italian, Japanese, Korean, Polish, Portuguese, Russian, Simplified Chinese, Spanish

## System Requirements:

ZEISS Labscope for iPad	ZEISS Labscope for iPhone	ZEISS Labscope for Windows
iPad Pro	iPhone 7	Minimum: i3 dual core CPU 2G RAM Display with 1027×768 (XVGA) resolution
iPad Air 2	iPhone 7 Plus	
iPad Air	iPhone 6s	Recommended: i5 dual core CPU 4 GB RAM Display with 1920×1080 (Full HD) resolution Touch support
iPad (4 <sup>th</sup> generation)	iPhone 6s Plus	
iPad mini 4	iPhone 6	
iPad mini 3	iPhone 6 Plus	
	iPhone SE	
	iPhone 5s	
iOS 9, 10 or above	iOS 9, 10 or above	Windows 7, 10 – 32 bit or 64 bit
		At least one of the following connectivity: Gigabit Ethernet 802.11n/ac compatible wireless network adapter USB 2.0/3.0 interface

## **In-app Help System Integrated in ZEISS Labscope**

There is an in-app help system integrated in both iOS and Windows based Labscope imaging software for you to quickly get guidance on software functions and features. For iOS-based Labscope, each time when you get into a new function interface, there will be an "help overlay" pop up, which contains explanation of the current screen, along with textual descriptions of all user elements that might require explanation.

You can always revisit this "help overlay" by activating it in software setting. For Windows-based Labscope, the "help overlay" could also be easily called up by pressing help button at any time.

## **Your Customer Support: ZEISS Labscope Online Forum**

You can always seek support via the Labscope online forum. All posted issues will be checked and answered by ZEISS professionals within shortest time.

## **Software Updates**

Labscope imaging software will be updated and released periodically. You can download the actual versions via the Apple's App Store for iOS-based software and ZEISS Website for Windows-based software.

*Profit from the optimized performance of your microscope system with services from ZEISS – now and for years to come.*
